

To whom it may concern

I am appalled at the government's proposal to cut marine reserves. This is a shortsighted and self-interested move that runs directly counter to the interests of the vast majority of Australians, not to mention the interests of all the sea life that has a chance to thrive within the existing reserves. Furthermore, removing protections on this area of sea is detrimental to the interests of the global population.

If these plans go ahead, it will be the largest environmental black mark on an Australian federal government since I have been alive (1971).

I urge you to reject these plans, or withdraw them if you have the power.

Thanking you in anticipation of your response,

Tom
