

I would like to make a submission regarding any changes , reductions to these areas.
These Parks were created to help conserve the ecology of our Oceans (Worlds Oceans) just
like National Parks on land and for Australians who fish
Fish and other sea creatures are thriving in these areas and fishing areas next to these Parks has
improved
There areas were based on Scientific knowledge to conserve areas of importance
There should be NO reduction in these areas they were created to encourage the World to
follow for the good of the Planet
Political parties should not change these areas because the other side of politics created these
parks.
Australia leads the world in creating these Parks dont let us lead the world in destroying these
areas for some short term game.
So please show World leadership and increase these areas not destroy this advancement.
The world is watching.

Regards
Barry Melville
