

Our clean foods, water, air are the envy of the rest of the world.

Tourism earns billions of dollars.

What will be left if we lose our clean food, clean water, clean air image?

What country will want to send tourists to see where mining occurs, the Great Barrier Reef is dead?

All natural beauty gone forever and Australians left with ugliness and polluted food, polluted environment, pollution caused sicknesses?

We are the last place on this poor Planet Earth worth visiting.

Please protect it and be known as the politician who rescued our marine environments and our natural resources.

Don't be known as the politician who stood by, had the power to do something and did nothing, allowing millions of years of Australian beauty and resources to be destroyed in 200 years of this disastrous British invasion. I am so ashamed of my British heritage.

Be our hero

yours faithfully
Sandra Petersen
