

To Whom It May Concern:

I have heard, to my complete disbelief, that the Australia Government wants to cut the protection it gives to our oceans by as much as 50%. Are you people aware that approximately 70% of all our oxygen comes from our oceans? Two out every three breaths every person takes comes from our oceans. Oceans deserve every bit of protection we already give and more, not less and most certainly not 50% less.

It is beyond appalling that my Australian Government lets Japan and now the Japanese Navy come and slaughter whales (& pregnant whales!) in Australian waters and also in international whale sanctuaries.

Ban trawling, ban longlining - protect our oceans NOW! By 2048 (in just 30 years!) there will be no more fish of any description left in our seas. Protect what we have left before it is TOO LATE!

Yours sincerely
