

It is utter madness to consider closing down 50% of our marine parks to pander to the demands of the commercial fishing industry. These parks help to maintain the diversity and health of marine life which will ultimately be in the favour of commercial fishing, the consumer of marine cuisine, the environment, and biodiversity.

Why would you make a short term decision for a long term loss? You would be much wiser to make a long term decision for a long term gain. Please maintain the protection of marine life for all future generations including commercial fishermen.

Thankyou,

Ingrid Crosser
