

as a true Australian and having been in this beautiful country for over half a century I am totally and dismayed by the actions of our government to further reduce the marine reserves that surround our shores... I have in my lifetime already seen too much destruction of both our land and sea environment to now hear that that our government - the government that I in fact voted for shown no regard for our children's future and for the future of this planet..... STOP....and consider your decisions..... the oceans are the lifeblood of this planet... your decisions will further add profit to the greedy by allowing our oceans to be raped and plundered by the mid range and longline trawler industries.... nothing survives in their paths..... they take everything including the massive profits.....STOP.... and consider what and how your decisions will affect every single man woman and child ... your decisions will inevitably destroy the world we know... maybe not tomorrow but definitely in the near foreseeable future..... STOP..... and consider your decisions. I implore you
