

To the Federal Government,

Re: Please Reinstate the original draft plans that have substantially increased marine protection

The Labor Government plans were well received but the recent draft plans have much less marine park protection - so disappointing.

The Coral Sea's protection is paramount to the re spawning and health of Australia's Great Barrier Reef - which supports a much needed Tourism industry and employment.

Short term gains on resource extraction such as fishing are robbing future generations their livelihood and economic growth.

Let's be wiser and increase marine protection to the highest standard for the benefit of Australia.

Thank you
