

To those deaf pollies What is it with you guys . You ruin out best grazing / agricultural land in the Gunnedah / Tamworth district , by allowing coal mining, I suppose you realize the top half metre of soil that does the growing, that's lost forever. Smart eh?

You allow fracking anywhere at all nothing is sacred 200 mtrs. from homes in Camden. At one stage it looked to happen in St. Peters thank God that fizzleled out , but it was close . Don't you understand what happens with fracking. It fractures the rock structure allowing trapped oils waters and gasses to leak thru the rock some of which is captured but a lot leaks into the water table , poisoning the water with chemicals from the " drilling mud " . The fractured rock allows natural springs to change course and stop flowing . Pity the poor grazier with no stock water . But why worry your expanding waistline . Just vote yourself a further wage rise and nod off to sleep again .

So now you allow overseas companies to rob and steal our river waters designated for river health and downstream populations . No doubt these waters will be resold to parties at a dry moment with an appropriate profit .

You allow rampant export of food and medicines off our shop shelves leaving Aussie babies to experience the meaning of 2 nd class citizen at a very early age .

So we now have a whole new field of theft bribery and corruption with our oceans or at least the continental shelf but the main thing is there will be fish aplenty to find . Already you must be printing the invites to all illegal fishers just like the ones in Timor . Thank God for the " Sea Shepherd" they seem to have more balls than our invisible do-nothing Navy . Given a little more time we won't need a Navy because we will not own a port for them to dock in , but then no need for a Navy Australia will all be owned by overseas interests .

So its keep the tiller steady my term of Govt. will be up soon , then who cares ,a nice retirement handout to see me out. Mick Bluett
