

I am appalled and very disappointed at hearing the govt's plan to cut back our Marine Sanctuaries. They already represent only a small proportion of our coastline and need to be preserved. They are the nurseries of the ocean and need to be maintained for ecological reasons, for replenishment of fish stocks, and for future generations. Please don't let our oceans become a wasteland through overfishing as has happened in many other parts of the world. Please preserve and protect our Marine Sanctuaries.
