

Hi,

I am an Australian Citizen and have paid tax dollars for over thirty-five years, yet I continue to see bad judgement by governments.

We should continually be striving, reaching for better.

Lately it is getting worse and worse.

WTF is going on?

Why are we not sufficiently not protecting our oceans?

Is it really greed? Do you think that you will be immune to the consequences?

I support my taxes going to protecting our land and oceans.

Maybe money can be taken away from other areas - believe me it is possible.

Kate
