

Hi,

The online form doesn't appear to let me lodge , it locks up at the comment area and provides a message "required field" even when text is entered in the comment area. so I am providing feedback via this email.

The Gillard Government proposal introduced a good level of protection for our marine environment. The current proposal diminishes that level of protection and will have adverse impacts on marine biodiversity and ecotourism. I do not support the current proposal and request that the Gillard Govt proposal be reinstated in full.

Thank you

Dave Burrows
