

Dear Minister Frydenberg

I am amazed and horrified that the government would even consider cutting back our Marine Parks at all. We have a unique environment which needs to be protected.

How would cutting the protected area by approximately 50% be of any benefit to the environment?

Planet Earth takes care of us and we need to take care of Planet Earth, otherwise if we continue to be reckless in our actions eventually there will be no environment that sustains us and everyone and everything will suffer beyond repair. We need to continue protecting our Marine environment.

I say no to cutting the protected area that was introduced by Labour in 2013.

Please consider changing your support to cut back the Marine Park.

Yours sincerely
June Eggleton
