

How dare you consider repealing the coral reef protection Tony Burke initiated for our precious coral reefs. I cannot believe that you are threatening these reefs survival, all in the name of money and greed. When will you learn that you cannot continue to allow destruction to Australia's natural habitat to make another dollar. We as the public will not tolerate this, and it will definitely show in the polls.

Shame on you Minister Frydenberg, you obviously have no consideration for children and grandchildren of our generation, as you are leaving them no legacy.

Kind regards

Deborah Clarke
