

Dear Minister Frydenberg,

I'm writing to you to express my concern regarding proposed protection cuts to marine national parks. I do not support the proposal and specifically do not support the following:

- any reduction in boundaries and/or re-classification of areas in a manner that weaken protection, e.g. habitat protection zones replacing sanctuary zones,

- any increase in commercial fishing and/or allowance of currently prohibited types of commercial fishing e.g. trawling.

On a general note, I'm not very impressed with the Coalition's attitude to several key environmental and future energy supply issues (including the issue I'm writing about) and at this stage Labor is looking like it's going to be the more sensible vote!

Thanks for listening.
