

Mr Turnbull - if you seriously plan to diminish the protection of our marine life and oceans that are so precious now and to be cared for in the future, you can surely count me out of any votes in the future. I was one to vote you in. I hoped you'd be more proactive in caring for our environment. I hoped you'd be passionate in protecting what is not only uniquely Australia's contribution to the Wonders of the World but that of the whole planet. Should you reduce protection you will be responsible for damage that is foolish, disgraceful, sad and irreversible. Not to mention the ripple effect impact on matters more that we can even foresee right now.

Please have compassion and passion for the care and consideration of our oceans and marine life that need us to care for them and speak up on their behalf.

Regards, Carmel
