

I am strongly opposed to any reduction of marine protection

our fish stocks are shrinking fast

<http://www.alternet.org/environment/global-fisheries-are-collapsing-what-happens-when-there-are-no-fish-left>

coral reefs are under threat

<http://www.bbc.com/news/av/science-environment-34472026/world-s-coral-reefs-under-threat-from-bleaching>

<http://www.defenders.org/coral-reef/threats>

It is the height of short sightedness and irresponsibility to cut marine sanctuaries in these circumstances

From ROWAN
