

Dear government.

Few people in the world have an opportunity to truly make an impact in this world. Through hard work and listening to community you have made it to a place of power few will ever see.

Please do good things with this power.

Continue listening to community ahead of big industry who talk rainbows of money but ultimately liquidate environmental resources for limited jobs and private profit. It's old politics when we need new thinking.

Removing important ocean protections is old thinking. Start getting progressive.

I'm watching and will change my vote accordingly on this.

Regards,  
Triton
