

Minister Frydenberg,

I call on you and the government to take no backwards steps in protecting our oceans through the marine parks already declared. The plans which have been released by the government will make Australia the only nation in the world to be actively reducing its protections for the ocean.

There is no precedent in history for an area so large to be taken out of conservation, and if followed through will once again prove to the world and the Australian voter how little care or interest you and your government have in preserving our environment.

I call on you and the Government to drop this outrageous plan and to retain the level of protection that was enshrined in Australia's Marine Park Network in 2013.

Sincerely,
David Parsons
