

Dear Minister Frydenberg,

The recommendations to reduce marine park protection in the Coral Sea are a disgrace.

I am writing to call on you, as the Minister for Environment and Energy, to reject these recommendations; I do not believe the recommended zoning will create a high enough level of protection for this amazing part of the world.

A 10% cut in the area that is protected is around 97,000 square kilometers; that is entirely unacceptable.

Please reject these changes that could see the marine life and tourism industry in the area be severely negatively impacted by such a decision.

Kind regards,

Courtney May
