

Minister Frydenberg

You should be increasing the size of our Marine Parks not reducing them .

For the future of Tourism and for our children and future generations Minister Frydenberg you must wake up to yourself and increase the Marine Parks . I request you must listen to the people of Australia who voted you in together with other politicians objecting to your reckless ideas and decisions

With the increasing harvesting of fish which have no where to breed and survive is and have safe marine park havens one day we will wake up and the fish will no longer exist !!

I normally vote Liberal but not anymore unless you increase marine parks and back off from your current position on reducing marine parks

You Guys wont make it through the next elections because you dont listen to the voices of Australians

Yours Sincerely

Chris Trckey

Oh BTW I fish and enjoy visiting the marine parks with my children
