

Hi,

I believe it's important to maintain the marine reserves due to the human impact which is and will continue to have a negative impact on the ecosystems if we do not action now. The repercussion are massive if we do not do what is in our power to stand for such a vast and rich ocean life.

It is vital for the government to stand And follow through with the facts which are right in front of us such as climate change, over fishing and the entire ecosystems life force which provides for us.

Please consider strongly the implications of damaging our fragile marine life.

We must continue the implementation of our striving and world famous marine park network.

Thanks for your time,
Paige Birnberg
