

Minister

I believe you are out of touch with the majority of Australians' environmental agendas and especially by opening up valuable marine reserves that will ultimately improve our fishing stocks as well as the overall habitat quality?

Minister, why are you also out of touch on energy sourcing ? Is the Coalition supported by mining interests ? I don't understand you and I thought I was liberal.

Not even many of Joel Fitzgibbons blue collar electors support keeping Liddel power station open.

Start working for all Australians please and stop the mindless slogans.

Australians aren't all stupid.

Thank you  
Ian
