

Dear Minister,

I am a concerned Australian who is shocked and appalled at the continuing actions your government is taking to wind back environmental protections in this beautiful country

I do not understand how anyone who can claim to be an Australian could countenance the destruction of our previous marine environments

Please reconsider this horrific decision and consider the impacts it will have .

Not only the impact on the marine life, but also tourism trade which is a massive money area for the country. The removal of protections puts us behind the rest of the world in terms of ignorance and allowing willful destruction of our environment,

Regards

Elizabeth Ryan
