

Minister Friedburg,

I'll try to address you respectfully, despite the fact that like Donald Trump you are completely undeserving of any respect.

The reckless action you are taking to cut back ocean protection is so appalling, it makes it hard to believe that you've had any environmental education. How is it that such ignorant dorks such as yourself can rise to positions of political power?

I think you need to be shoved back into compulsory school to learn what you've clearly failed to learn.

This letter won't make an iota of difference – ignorance like yours is bound to ignore anything said to you that contradicts your ignorant stand.

Please go for a very long swim. May you be caught in a trawling net.
