

Dear Minister **Frydenberg**,

**It is of concern that I note the governments intention to reduce existing marine parks. These are important to our country and the ongoing preservation of marine life for our future generations. I ask you to reconsider this. While I note that there are economic concerns as well as environmental concerns my concern is for the ongoing future of our beautiful country as well as its potential for more tourism, which we will lose if we further degrade our coastlines.**

**Regards**

**Diane Pridham**
