

Hello,

I am appalled and horrified that this government is reducing the marine parks around Australia.

Not only do these areas support the sea life, they bring in tourist money but most importantly they provide a sanctuary for the breeding of fish. If this government is so stupid as to think that the world can survive without our oceans and that they are inexhaustible supply of food then they have to go.

I cannot continue to accept the negligence of this government for our environment, I can no longer in any conscience way support them. They have shown that business is more important than the environment and by doing so show a complete disregard for the continuance of our home, our world and our race as a whole. We face huge challenges ahead and all they can do is bury their head in the sand and pretend nothing is wrong!

This government is a disgrace by world standards as well as local. They are a joke!

Sincerely  
Penne Anderson
