

I can't believe what I'm hearing - yet it's hard to make this sort of stuff up.

This government is talking about cutting the marine protection around Australia, by 50%. Are they mad?

I'm guessing that a big money deal is going down.

I reject the plans to cut marine protection.

The Coral Sea, Marion Reef and Osprey Reef are all National Parks and need to stay as they are. Shark and Vema Reefs need to be back in the Marine National Park conservation area.

Please see sense. Our world is the only one we have.

Please, Look after it.

Thank you
