

Why take marine protected areas away?

They are so little, in the big scheme of things. They are a talisman, a bellwether. We need to protect really special places as nurseries, as refuges, as places for animals to build strength, lick wounds and weather man-made environmental storms.

Our job is to protect Australia, for us, for nature and for our children. It is your job to make sure this happens, please do it right.

Please, if anything, protect more of our environmental treasures.

Thank you,  
Sincerely yours as a voter and taxpayer, JoAnn
