

Minister.

Cutting back on protection of our Marine Parks will be a reckless decision.

I'm Scuba Diver of many years and have seen the decline of fish over the years, I've been overseas and been to Marine Parks that have been around for three and four decades and in third world countries, so I know it works.

Maybe you should go and have a for yourself instead listening to vested interests.

Peter Esz.

PS.

I've been a Coalition supporter for many years, but this decision disturbs me greatly.
