

As a concerned citizen I would like to have my say regarding cut backs to our Marine Parks.  
No to Marine Park cut backs. Reducing marine parks is not a sustainable move for our waters. They are more valuable to Australia's future left intact. Opening them up for longline fishing or other exploitation will reduce valuable fish stocks & leave nothing for the generations to follow.  
Please consider the part these sanctuaries play for the health of our Seas & Oceans. I have been diving in marine parks and noticed the difference in the health & diversity of marine life there .  
Thank you for your consideration,
