

Dear Minister Frydenburg,

I object strongly to any cuts to our Marine Parks and object equally strongly to the allowance of factory fishing vessels in Australian and surrounding seas.

Blind Freddy would know and understand how damaged through overfishing and pollution the planet's seas are with at least 7 DEAD ZONES acknowledged.

Our continent's oceans and waterways are too important to risk by reduction in Marine Parks and protected waters.

Do not alter existing legislation. Put the health of our Marine ecology in the forefront for us and future generations to be able to admire and benefit from.

Yours faithfully,  
Keelah Lam
