

I am extremely concerned at the news that the Turnbull Government is proposing legislation that will; cut our hard-earned Marine Parks. Our planet needs a healthy environment and that depends to a large extent on healthy oceans and seas. These are still not thoroughly observed and we know not what we destroy.

Reducing Marine parks opens up whole areas to large scale fishing. Large trawlers do not just take what they can sell but take quantities of bi-catch and disturb the whole underwater environment.

For the sake of our planet and its inhabitants we need more not less marine protection.

Please do your best to see that we, the inhabitants of Australia, get what we need and contribute to a healthier, more sustainable world.

Yours sincerely,

Anne Sanders

P.S. And we do not need to eat fish!
