

Hi Josh,

I am appalled that the govt is considering drastic reductions to our marine parks.

Now, more than ever before, we need to preserve areas of our oceans and coastal habitats. If we don't have totally protected areas for fish and other marine populations to grow, we will surely reach catastrophic depletion of numbers in the near future.

Our oceans are finite, believe it or not!

Be a leader.

Be a hero.

Do something you can be proud of and hold your head high:

Don't cut our Marine Parks!
