

Have any of the enviro. ministers ever listened to what us Aus. are talking about and what affects us on holidays. If you did listen at what is being said you will find holiday destinations being cut short because you cannot catch a fish!!! Everyone says the same thing. Why you cannot catch a fish because they have been fished out. Surely the marine parks are essential to let the fish stocks recover not be cut down further.

Even ship charter boats come back with no fish caught. Last two fish charter trips handed out free fish and chips vouchers to his people he felt so bad at not even a nibble! Please listen to us>

Yours Sincerely Betty Woods
