

Dear Minister,

Please do not revise the size or boundaries of our wonderful marine parks. This will endanger many species for a very short term profit for those who are maybe your backers - or at least lobbying you. They should be kept as they are and as was agreed some years back before Mr Abbott gained so much power in your party room.

Our country is very precious as are the seas that surround it. They should be kept for future generations and not used for short term gains - if there are any.

Regards, Janeen Edward.
