

Dear Mr Freydenberg

This is insane. CAN YOU NOT READ THE WRITING ON THE WALL? We are killing the planet. Jobs and growth is the mantra but development is destroying ecosystems that provide us with EVERYTHING.

The oceans are the temperature regulators along with forests

We need to keep these marine parks. Scientists are telling us all over the world if you care to read the hundreds of articles, research papers etc THAT WE HAVE NO TIME LEFT. Fishing has got to stop and we need to give half of the planet back to nature.

Yours Sincerely

Angela Griffiths
