

Dear Minister

To hear that the Commonwealth Government is considering this 'crime' against the preservation of Marine parks despairs me. What a world we are leaving behind for our children and grandchildren. I saw the film 'Blue' a few weeks ago and it still makes me upset to think about what I saw.

Please reconsider and think about this decision carefully. Perhaps a change of Government is needed next election to protect our environment, along with the recognition that Climate Change is a fact. Mr Abbott's comments today are very damaging to the current Government as well.

I look forward to hearing of a positive outcome as I care about the world I live in and do my best to be environmentally friendly.

Yours sincerely

Erika Kuhaupt
