

Dear Minister,

I am extremely concerned with the decision to substantially reduce the area of designated protected marine environment previously agreed upon. Equally concerning is the intention to re-introduce mid-water trawling and long-lining, which would allow and encourage the decimation of a sustainable source.

This amazing natural environment remains, for the most part, an untapped source of scientific knowledge and wonder, continually providing insight for the benefit of all Australians and the future.

Please accept this as a personal formal protest.

Yours respectfully,

Lynette White
