

Minister Frydenberg

I am writing to urge you not to wind back protection for our oceans and reduce Australia's marine parks. Healthy oceans are essential for all species and the recent horrific bleaching of the Great Barrier Reef, one of the natural wonders of the world, should encourage us all to act to increase marine protections against overfishing, heavy shipping, agricultural runoff and other pollutants. Please do not decrease our marine protections and instead work to provide increased protection for this natural resource so it can continue to support and provide for all species.

Yours in faith

Rebecca Jackson
