

Dear Minister

I was very moved by Tim Winston's excellent article decrying your proposed drastic watering down of marine park protections.

I never imagined when I was at school in the 1970's when pollution was much discussed and change in our practices was so obviously necessary, that our leadership on these issues would still be so poor in 2017.

Surely you can push back against the mindless attitudes of your very right wing colleagues on at least some issues like this?

Please channel some better purpose and cancel this appallingly retrograde proposal.

Yours sincerely

Roslyn Hunter
