

Dear Minister Frydenberg

I'm deeply disturbed by the plan to wind back protection of our oceans. With this action, we put at risk our delicate marine life and ecosystem and become the nation that is going backwards in marine protection. Our planet is delicate. This is the last thing we should be doing. Please, keep our strict protections in place and don't allow marine national parks to be rolled back or midwater trawling to be reintroduced.

Regards,

Kim Ribbink
