

Minister Frydenberg

I am appalled to learn you are considering cutting protection to Marine Parks! We are custodians of this land and the ocean, we do not own any of it!.

Marine parks are vital to ensure that future generations will be able to see the wonder that is in our oceans. I do not want to have to explain to my soon to be born granddaughter why our generation and your government did not stand up to protect Australia's unique and precious environment.

I have been a Liberal voter for 40 years, however, I can no longer vote for a party who puts the interest of big business and massive polluters before those of the people who voted them into power!

Overfishing through midwater trawling and longline fishing will see the depletion of species and maybe extinction. I urge you to reconsider this position.

Pam Merlo
