

Minister Frydenberg,

Just because you are a Liberal Minister, it is not necessary to try to wipe out any previous protections planned for our precious oceans. If you fear that we are being over protective of our fishing no go zones, our belief is that unless you do this, there will be much less to protect when the overfishing becomes more and more evident.

Our oceans are for our future well being, and not just for the greedy multinational fish factories.

We can help feed the world, and protect the life of the oceans at the same time.

Please keep the exclusion zones as they are.

Thank You,  
Genevieve and Mario Bernardi
