

Dear Minister Frydenberg

Please stop your plans to downgrade the Coral Sea's protection!!!

With the horrible effects of global warming and manmade pollution/spills are already having on our reef PLEASE PLEASE PLEASE don't downgrade their protection.

Our reefs need our help! Future generations will look back at us and think what a selfish cruel people we were. We need to protect our environment. Give the reefs more protection not less!!!

Have you ever scuba dived? Been under the sea? Seen what it's actually like down there? Our reefs are already suffering, I've seen the effects we are having on them already, and if these cut backs go ahead, I will be so ashamed... and our reefs will soon be gone forever.

Please listen to us and put a stop to these ridiculous plans.

**Regards
Kristie Baker**
