

Dear Honourable Minister Frydenberg.

Please refrain from your plan to axe the worlds greatest Marine Park. We cannot be fair dinkum about the reef and our oceans if we are taking retrograde steps to add little value to our country. Axing Parks is for financial reasons is the worst reason. The greatest Marine Environment in the world is worth more to us intact and not fragmented. You cant eat money when there is nothing left in the ocean. Remember that. See the value of something and not what its worth. Your legacy to generations can be something you can be proud of or it can be something you can apologise for to your grand kids. It is your decision.

Leave the Parks alone. Australia does not need a B grade Marine Environment. Ask some of our Asian neighbours how theirs are going. Why would they want to fish our waters illegally? Because there is something to fish.

Do the right thing. This Government has to stand for something.

Regards.

Mal Hull. (Undecided voter but leaning a long way).
