

Dear Minister,

You may be aware that the shadow minister for the Environment is calling for protection of our ocean marine reserves. It is certainly a valid call and one that I hope you will agree with and keep the reserves intact. However you could remind Tony that his track record was no better - and probably worse than many ministers for the environment all of whom fail their duty if commercial activities are threatened. You could take advantage of this lapse and be the first real minister FOR the environment.

regards.

Don Owers

Friend,

Thank you for contacting me about the Government's plans to cut back ocean protection in Australia's oceans. I put these protections in place five years ago when I was Environment Minister and Labor will **never stop fighting to protect them.**

**There are just 1 day left to stop the Government's reckless decision.**

**That's why I need your help.**
