

Minister Frydenberg,

I just can't believe in this time of global environmental disasters that you can be even considering the actions you take.

Siding with Japanese whalers and their ecocidal marine practices, handing out our resources to a corrupt Indian coal company which operate out of a tax haven.

You are just hell bent on wrecking Australia's fragile natural environment.

Land clearing, species extinction and now this act of vandalism by allowing commercial fishing in Marine National Parks.

I suppose you have plans to let the Japanese, Korean & Chinese in to do it?

You have no regard for the Australian electorate, you are just acting on behalf of commercial interests who no doubt generously fund your re-election campaign.

Charlie Rudd, Uralla NSW.
