

To the Federal Liberal Government of Australia, Planning,

There is nothing more precious than the Island home we call Australia including our oceans and the life within. We are blessed with sanctuaries for ever diminishing species. It is beyond irresponsible to make provision for invasive industry through slyly diminishing by a massive 50% the oceanic borders that protect us all and contain thousands of years of whale migration, coral development, sensitive eco systems including fish species that do not exist elsewhere. Responsible governments are not elected to sell out for short term gain what must be preserved. Governments do the right thing for their people and the environment. Do not change what works. Please.

Regards,

Fiona Dowler
