

Dear Tony

You have my full support in restoring protection for our oceans. These reefs are integral for breeding, feeding and shelter to many aquatic species. To ensure the longevity of our unique aquatic ecosystems and fishing industry these measures need to be put in place. The current government is selling us all out to international corporations who will suck the life out of our oceans for dollar profits, think back to the dutch super trawlers down in tasmania, they single handedly wiped out the fishing industry of east africa and unfortunately caused irreversible damage to Tasmanian waters.
