

Please don't half our Marine National Parks. These changes will make the Australian Government the world leader in winding back protection. Not something we would want to be known for!

Don't take any of the protected area away from the Coral Sea, Marion Reef or Osprey Reef and put Shark and Vema Reef back in the Marine National Park area.

The areas of Marine National Park need to be maintained in size and never decreased. It is vital for the future of marine life and for a proud tourism industry.

Yours sincerely  
Kerri Lahey
